Professional Summary

Informatics Engineering graduate from Jember State Polytechnic with a focus on Junior Python Developer. Experienced in developing responsive web applications, REST APIs, database-driven systems, and backend solutions using Python, Flask, MySQL, and PostgreSQL. Proficient in using Git/GitHub, and modern frontend technologies including JavaScript and Tailwind CSS. Has a strong foundation in software development, database design, API integration, and problem-solving through academic and project-based development.

Technical Skills

- Programming Languages: Python, JavaScript
- API Development & Testing: Fast API
- Framework : Flask, Django
- Frontend: HTML5, Tailwind CSS, JavaScript
- Database: MySQL, PostgreSQL
- Tools: Git, GitHub, VS Code, Figma

Projects / Internship Experience

Software Engineer Intern — PT. Artifisial Intelegensia Indonesia

Depok, Jawa Barat 16424 | Sept 2024 - Dec 2024

Nutrisense — Web-Based Nutritional Assessment System

Role: Full Stack Developer | Year: 2024

Tech Stack: Python, Flask, PostgreSQL, HTML, Tailwind CSS, JavaScript, REST API

Developed a web-based nutritional assessment system for elementary school students using Python Flask.

Designed a PostgreSQL database to manage recipe and nutritional data and support automated nutritional value calculations.

Developing a REST API to integrate food ingredient data based on the Indonesian Food Composition Table of the Ministry of Health of the Republic of Indonesia. 2018

Implemented responsive UI/UX designs using HTML, Tailwind CSS, and JavaScript.

Managed codebase versioning and repository maintenance on GitHub using Git workflow (branching, commit history, and push management).

Software Engineer Intern — PT. Kutai Timber Indonesia

Depok, Jawa Barat 16424 | Sept 2024 - Dec 2024

Log Data Optimization

Tech Stack: Python, Flask, HTML, Tailwind CSS, JavaScript, MySQL, Postman

Developed an automated server log backup system to improve data security and availability.

Built a web-based monitoring dashboard using Flask to organize and visualize server log data.

Optimized real-time log data retrieval to improve monitoring efficiency and accessibility.

Developed API endpoints and tested API functionality using Postman.

Managed script iterations and code base updates on GitHub using structured Git workflows.

Software Engineer Intern — PT. Kutai Timber Indonesia

Probolinggo, Jawa Timur | Aug 2025 - Dec 2025

CCTV Monitoring & Object Detection System

Role: Software Engineer | 2025

Tech Stack: Python, OpenCV, YOLO, Flask, HTML, Tailwind CSS, JavaScript, MySQL, Postman

Developed an automated people detection system using CCTV streaming to support real-time monitoring.

Integrated Telegram Bot notifications to send alerts when detected objects meet predefined detection criteria.

Developed a web-based monitoring interface using Flask and frontend technologies for centralized system monitoring.

Maintained source code versioning, commit history, and repository management on GitHub via Git.

SELECTED PROJECTS

CCTV Monitoring & Object Detection System

Role: Python Computer Vision Engineer

Tech Stack: Python, OpenCV, YOLOv8, Flask, MySQL,

- Executed frame-by-frame video stream analysis using OpenCV and custom YOLOv8 detection logic, achieving 92% detection accuracy across varying lighting environments.
- Built asynchronous alert functions in Python to send instant Telegram notifications containing detection bounding boxes and frame captures.
- Repository: https://github.com/igfirli06/people_detection

Nutrisense – Web-Based Nutritional Assessment System

Role: Python Backend Developer

Tech Stack: Python, Flask, PostgreSQL, REST API, Tailwind CSS

Engineered a Python Flask core processing engine that automates dietary intake evaluations for elementary students with sub-200ms API response latency.

Designed PostgreSQL relational structures with primary/foreign keys and indexed queries to manage nutritional values, recipes, and user logs.

Repository: github.com/igfirliina/nutrisense

Education

Politeknik Negeri Jember

Bachelor of Informatics Engineering / D-IV Teknik Informatika

2022 – 2026

2022-2026
